High Performance | Tight Tolerances | Clean Cuts

The Letter Lok 4000

Manufactured for the channel letter industry, the LETTERLOK 4000 with a 25" deep throat and 10" deep reach this machine is the largest clinching machine on the market and will handle today's demand to reduce your channel letter fastening costs and is guaranteed to outperform the competition.

Features:

- New Development SPR (Self Peircing Rivet) tooling option
- Machine can operate at 60 to 80 cycles per minute
- Maximum combined material thickness of .160
- Machine is 100% air power
- Has an adjustable table to accommodate a 10" deep return
- UL recognized tooling

Specifications:

- 3" Solid Steel "C" Frame
- WAMP pneumatic power unit, Single shot auto return
- 10" low pressure closing stroke
- 1/4" - 38" high pressure stroke
- 25" deep throat
- 30" deep x 60" wide table, 44" working height
- 65 psi at operating of the clinch
- 125 psi (max supply) 80 psi (imn)

Are you thinking about ACM (Aluminum Composite Material) for your Letter Backs? Now with the SPR tooling option, the LL4000 offers greater capacity clinches and faster cycle times for increased production.
